

Useful digital work.

A clear route from idea to handover.

An independent service brand for businesses that need a useful website, a focused application workflow or a clear product video. Start with a reviewed brief and an agreed deliverable.

Websites & enquiry pages

Responsive business pages, catalogues, contact actions and labelled forms. Platform, delivery integration, privacy wording and hosting are agreed in the scope.

Small web applications

Focused catalogue, stock and workflow interfaces. Production login, databases, integrations and deployment require technical review and an agreed implementation plan.

Mobile app design & prototypes

Interactive mobile layouts to review a workflow before building. Native Android or iOS implementation, store publication and ongoing maintenance are separately scoped.

Product videos & motion graphics

Short vertical edits from permitted footage, accurate approved wording, original motion graphics, an agreed revision and MP4 handover.

Implementation & support

Review an existing project, define the change, build in a preview, verify the agreed behaviour and document handover. Support period and response expectations are agreed; no 24/7 promise.

BRIEF / SCOPE / BUILD & REVIEW / HANDOVER

Send your public website or product link and the task you want customers or staff to complete. Fee, timeline, revisions, access, hosting and support are agreed before accepting work.

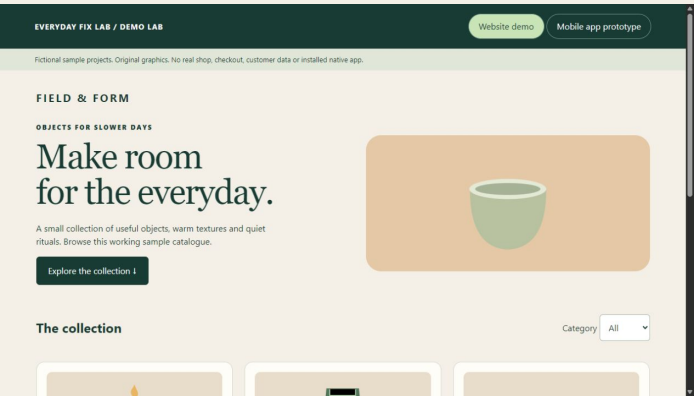

Original fictional demos demonstrate the approach. No client results, native app releases, certifications or sales guarantees are claimed.

Try the work.

Real screenshots of our original fictional browser demos. Use sample information only; these do not collect customer enquiries or create real orders.

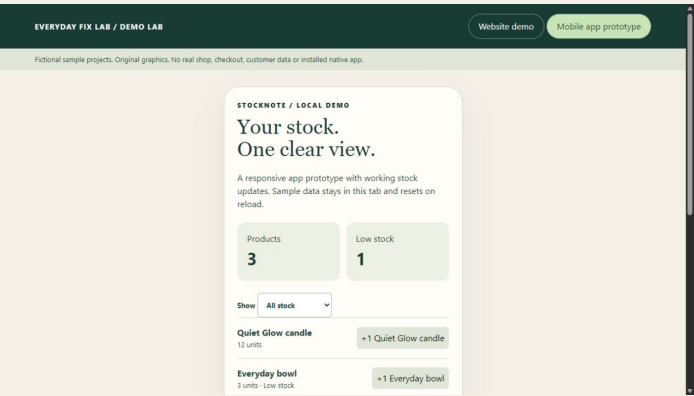

01 / Catalogue website

Working filters and an enquiry list; no payment or checkout.

02 / Stock app prototype

Stock filters and quantity updates; no shared database or native app.
